Dear Mr P Baguley

Application reference: 2010/0289

Address of proposal: Severn Trent Water plc, Stoke Lane, Stoke Bardolph, Nottingham NG14 5HL

I am writing to object to the proposed wind turbine development at Burton Joyce / Stoke Bardolph due to the adverse effects which these turbines will create.

I am particularly concerned with the effects of the Noise & Shadow Flicker that these 52m blades will cause. Severn Trent has acknowledged that this can occur at distances of up to 1km from each turbine, causing a continually moving shadow to be thrown across the landscape.

I find the thought of this very distressing and I feel that it will prevent me from enjoying the benefits of my own garden whenever the sun is shining. The thought of my house being subjected to an indiscriminate strobe effect terrifies me. Surely it is not acceptable to allow these massive turbines to decimate my quality of life.

I am also very worried about the constant noise that these turbines will generate throughout the evening /night when our village becomes a quiet and tranquil place.

It is my view that this proposed developed is wholly inappropriate for this location.

Yours sincerely
